Risk Governance Master Class

Training & Certification

For Senior Managers and Board Members

The need for risk governance and leadership arises from the increasing complexity and uncertainty of the business environment. Organisations today operate in an environment characterised by rapid technological change, shifting market conditions, and increasing regulatory scrutiny. These factors have led to a growing number of risks that organisations must manage in order to achieve their strategic objectives. Effective risk governance is essential for organisations to navigate the complexities of ERM. This involves the development of a governance framework that provides a clear structure for decision-making and accountability in relation to risk management. Moreover, leadership is also critical in building a risk culture and implementing effective ERM. This involves setting the tone from the top, creating a good culture towards risks, and ensuring that risk management is integrated into the organisation's overall strategy and operations.

Risk Governance Master Class is designed specifically for senior managers and board members in charge of implementing an effective control environment and risk oversight. The program is focused on providing practical case studies and conceptual learning points that can be applied to a real-world scenario. The curriculum is based on learning by the case method, group work and personal reflection sessions.

The module of Master Class on Enterprise Risk Governance has been originally developed by:

CRMS Global is a non-profit organization that focuses on Risk Management education. Their commitment is to facilitate and encourage the acceleration of risk management practices in Indonesia through knowledge advancement and sharing initiatives.

IN COLLABORATION WITH:

ERMA, a global learning centre for professionals in Enterprise Risk Management, provides a comprehensive set of Enterprise Risk Management courses and certifications, and is facilitating collaboration efforts of ERM professionals around the world.

IFC ADVISORY SERVICES ARE SUPPORTED BY:

IFC, a member of the World Bank Group, is the largest global development institution focused exclusively on the private sector. Working with private enterprises in about 100 countries, we use our capital, expertise, and influence to help eliminate extreme poverty and boost shared prosperity. IFC promotes the adoption of good corporate-governance practices and standards to improve the investment climate.

Certification

This program leads to one of ERMA professional designation, CERG (Certified in Enterprise Risk Governance). CERG is given to high-level ranking officers and decision makers who can demonstrate their competency through superior knowledge and experiences in assuring and overseeing the ERM implementation in their organization.

All participants are eligible to obtain CERG certification through Provisions Program (Experience-Based Assessment) by fully attending the Master Class Risk Governance program with the following criteria:

Who should be certified?

Senior leaders or executives in organizations, board members, and those responsible for shaping risk culture, establishing governance structures and aligning risk with business strategy.

Minimum Requirements:

5 years experience as board member or 2 years experience as board member and 5 years of risk management experience

The Convergence Era: Where Risks Collide Resilience Emerges

3-4 December 2026

The Anvaya Beach Resort
Bali, Indonesia

Risk Beyond 2026 provides you a broad scope of insight in various issues, challenges, and cases that can be applied in real world setting. In addition, this event will also facilitate discussion and practice sharing about the situations that have been and will be faced from several different perspectives with their own experiences and approaches towards them, including regulators, policy makers, organizations, professionals, academicians, and society.

The main theme for Risk Beyond 2026 'The Convergence Era: Where Risks Collide, Resilience Emerges' with a number of interesting topics such as:

Fault Lines:

Business in the Age of
Geopolitical Competition

Intelligence at Scale

Technology, Trust and the Future
of Decision-Making

Decisions under Pressure:

Leadership, Decisions and
Organisational Resilience

The New Energy Equation

Security, Sustainability and
Strategic Resilience

The Confidence Factor:

Innovation, Trust and the Future
of Financial Services

The Next Convergence

What's Next for Boards, Risk Leaders
and GRC Professionals?
